

## Rejuvenate your skin with sweet body scrub

Kori Ellis

**Body scrubs exfoliate your skin, sloughing away dead skin cells and leaving fresh, rejuvenated skin. If you use a body scrub weekly in the bath or shower, you will notice a marked improvement in the appearance of your skin. Body scrubs normally use salt or sugar mixed with oil to renew and moisturize dull, dry skin, stimulating circulation and making your skin glow.**

Sweet Beauty Candy Cane White Chocolate Body Scrub is the perfect product for the holiday season and year round. The aromatic peppermint of candy canes can stimulate your body and mind. Now that scent has been packaged in a [body scrub](#), along with organic sugar, essential oils and cocoa butter to revive your skin and renew its natural sparkle.

As the weather gets colder, it's important to step up your [skin](#) care routine and this product will do just that, leaving winter weary skin looking new again. The peppermint infused with sweet white chocolate will leave your skin feeling refreshed and cool.

The Candy Cane [White Chocolate](#) Body Scrub and other Sweet Beauty products are available at spas and boutiques around the country. You can also shop online at [sweetbeautyspa.com](http://sweetbeautyspa.com).
